The Leading PayTech

Redefining Payments in Italy

Nexi in a nutshell

Italy: Large and underpenetrated market with unique structural characteristics

Note: Selected countries include Western European countries and exclude Turkey and countries with data based on modelled assumptions made by Euromonitor International. Total Consumer Spending is defined as the sum of Card Payment Transactions (Excl Commercial), Cash Transactions, Other Paper Payment Transactions and Electronic Direct/ACH Transactions. This tracks retail purchases, purchases of services, utility payments, rent payments, etc. Excluded transactions include peer-to-peer payments, taxes, fines, loan interest charges, and investments (including real estate). Card Payment Penetration is defined as Card Payment Transactions (Excl Commercial) divided by Total Consumer Spending. Consumer Card Payments is defined as Card Payment Transactions (Excl Commercial).

Nexi investing to drive the transition from cash to digital payments in Italy

Key Limiting Factors For Digital Payments penetration

Acceptance Infrastructure

- Infrastructure well in place and contactless-ready but...
- Still uneven distribution of POS terminals amongst merchants
- Low speed due to poor connectivity

Cards infrastructure

- Unbalanced mix, high share of prepaid and relatively low credit
- Credit mainly charge, with low plafond limit; revolving marginal
- Debit still dominated by national scheme with limitations

Perception

- Consumer perception on spending control
- Merchant perception on reliability, control and price complexity

nexi

- “Start” simple bundled offer to address unpossed merchants
- m-POS, Smart POS mini 4G
- POS replacement/reconfiguration to broadband connectivity
- Accelerated transition to Contacless

- Revamped and extended credit portfolio
- CVM, installment/EasyShopping, smart allowance mgmt., ...
- International Debit, Next generation National scheme

- Nexi Pay, Spending control, #iocontrollo, 3DS, Biometrics
